

# What's RIVESTAR?

RIVESTAR is the brand name for RIKEN TECHNOS film, whose main raw materials are polyester resins.

green

**1** Rivestar film does not contain substances suspected distributing internal secretions specified by the "Environmental Hormone Strategy Plan Speed 98"

**2** The calories burned are low (about the same as for paper and wood), so there is no cause for concern about damaging incinerators. (substances specified by the Environmental Agency in its "Environmental Hormone Strategy Plan Speed '98" ). RIVESTAR is "environmentally friendly film" that is gentle to the earth's environment and safe for people.

**3** Being hard, polyester film has excellent machinability. No "machining chips" occur, so work can be done smoothly.

RIVESTAR

Olefin resin

**4** Applications included: cabinet, doors, desk tops, store fixtures, shelving and components.

**5** 3D laminates conform to three dimensional surfaces of MDF to provide an attractive seamless appearance. This eliminates the need for edge banding or other special edge treatments.

**6** Can easily be cleaned with soap and water and provides increased stain and scratch resistance for horizontal high wear usage.
